

Stud Service Agreement

This agreement is entered into on the _____ of _____, 20____

between _____, hereafter referred to as the Client, and
_____, hereafter referred to as the Breeder.

The Breeder hereby agrees to provide stud service for a female Canaan Dog owned by the Client, in return for a fee of \$_____ plus expenses (such as costs for veterinary tests and shipping), due prior to return of the bitch.

Stud Dog:

Bitch:

Prior to arrival, the Client's bitch must have tested negative for brucellosis and the test should preferably be done after her last heat but prior to shipment. If the bitch has not been tested prior to arrival, she will not be introduced to the stud dog until the test has been conducted and the results known.

The Client agrees to leave the bitch with the Breeder for up to a week, if necessary, to achieve a natural mating. The Client's bitch will be serviced a minimum of twice, if possible, and more often if deemed necessary. Should the Client's bitch fail to conceive, the Breeder will refund the stud fee or guarantee a repeat breeding at no additional charge except for expenses. If the bitch should bear no more than one liveborn puppy from this breeding, the Breeder hereby agrees to provide an additional breeding of this dog to that bitch in one of her next two seasons for no additional fee except expenses.

A boarding fee of \$_____ per day will be charged, commencing on the third day after the date of last mating, if the bitch remains on the premises without prior agreement.

This litter resulting from this mating must be registered and all buyers should be encouraged to register offspring of this mating within the first year of life. No offspring may be given or sold to unethical breeders as stipulated under the ICDC Code of Ethics.
